NEXUS · DOCUMENTATION PACKAGE · DELIVERABLE 10

User Manual

Task-based instructions for Nexus users: account, projects, tasks, habits, settings and working offline.

Document control

Document ID	NX-10-UM
Version	1.0
Date	2026-11-05
Status	Draft for team review (not approved)
Intended readers	People using the Nexus Android app (signed-in users) and testers following the demo
Evidence baseline	Branch New-Changes at commit 3a3f275 (tree identical to main at 9f8e82a)
Prepared by	AI-assisted (Claude Code) from repository evidence; team review pending
Approved by	Unknown No approval recorded

Evidence labels used in this document: Implemented verified in code, configuration or test output; Inferred reasoned from evidence but not executed; Recommendation proposed, not implemented; Open question needs a decision; Unknown no evidence available; Estimate planning figure, not a measurement.

Contents

1. 1 Before you start
2. 2 Account
    1. 2.1 Create an account (UM-01)
    2. 2.2 Sign in and sign out (UM-02)
3. 3 Today screen
4. 4 Projects and tasks
    1. 4.1 Create and manage a project (UM-03)
    2. 4.2 Add and edit tasks (UM-04)
    3. 4.3 Find tasks (UM-05)
5. 5 Habits
    1. 5.1 Track a habit (UM-06)
6. 6 Settings
    1. 6.1 Change your profile and preferences (UM-07)
    2. 6.2 Export your habit history (UM-08)
    3. 6.3 Change password or delete your account (UM-09)
7. 7 Working offline
    1. 7.1 Understand the sync banner (UM-10)
    2. 7.2 Resolve a conflict (UM-11)

1 Before you start

- You need an Android phone or emulator running Android 7.0 or later, with the Nexus app installed from a build provided by the team. No app-store listing exists.
- Your first registration or sign-in must happen while the device can reach the Nexus server. After that you can keep working offline.
- Nexus has one kind of user. Everything you create is private to your account, and there are no shared projects.

> Screen labels in this manual are the English ones. If you choose isiZulu or Setswana, the sign-in screens and some labels change language; most other screens stay in English.

2 Account

2.1 Create an account (UM-01)

1. Open Nexus and wait for the intro animation to finish. The Login screen opens.
2. Optional: choose your language in the **Language** box.
3. Tap **Need an account? Register**.
4. Enter **Display Name**, **Email** and a **Password** of at least 6 characters, then tap **Create Account**.
5. The Today screen opens. You stay signed in when you close and reopen the app (for up to 24 hours per sign-in).

If you see "Something went wrong. Please try again." when registering, the email may already be registered, or you made too many attempts in a short time. Try signing in instead, or wait 15 minutes.

2.2 Sign in and sign out (UM-02)

1. On Login, enter your Email and Password and tap **Sign In**.
2. To sign out, tap **Log Out** on the Today screen or in Settings, then confirm.

If a wrong password is entered, the app currently says "Your session has expired. Please log in again." Check your password and try again. This message is a known issue (AUD-18).

Changes you saved while offline stay on the device after you sign out. They upload the next time *you* sign in on that device. Another person signing in on the same phone will not see them.

3 Today screen

The **Today** tab shows how many projects and tasks you have and how many tasks you've completed ("Activity"). Under **Your schedule** are three cards:

- **Overdue**: unfinished tasks with a due date before today.
- **Due today**: unfinished tasks due today.
- **Upcoming**: the next three unfinished tasks with a future due date.

Tasks without a due date do not appear in these cards. "Showing saved data" means the numbers come from your device because the server could not be reached.

4 Projects and tasks

4.1 Create and manage a project (UM-03)

1. Tap the **Projects** tab, then the **+** button.
2. Enter a **Name** and an optional description, then confirm.
3. Use **Search projects** to filter the list by name.
4. Tap a project to open it. There you can rename it (**Save Project**), add tasks, open the task list (**Open Tasks Screen**) or **Delete Project**.

Deleting a project also deletes all its tasks. List deletes do not ask for confirmation, and there is no undo.

4.2 Add and edit tasks (UM-04)

1. In a project's task list, tap **+** (New Task).
2. Enter a **Title**. Optionally add a description, a **Due date** (calendar picker; the × clears it), **Priority** (None, Low, Medium, High) and **Status** (To do, In progress, Done).
3. To add labels, type in **Add label** and tap **Add**; tap × on a label to remove it. Add checklist steps the same way with **Add step**.
4. Save. Tap a task to see its details, then **Edit task** to change it. Setting the status to Done marks the task complete.

4.3 Find tasks (UM-05)

- **Search tasks or labels** matches titles and labels.
- Status chips: **All**, **Open**, **In progress**, **Done**. Tap **High priority** to show only high-priority tasks.
- The bar at the top shows "x of y tasks complete".

5 Habits

5.1 Track a habit (UM-06)

1. Tap the **Habits** tab, then **+** (Add habit).
2. Enter a **Habit name**, choose **Daily**, **Weekly** or **Custom**, and tap **Create**.
3. Each day you do the habit, tap **Complete today**. Tap it again (it reads **Completed today**) to undo.
4. Use the pencil icon to edit, or the delete icon to remove a habit.

The stats card shows your level, points, current and best streak (in days), completion rate and badges ("3-day streak", "7-day streak", "Reliable habit builder"). With more than one habit, the completion rate shown is lower than your real rate (AUD-17).

6 Settings

6.1 Change your profile and preferences (UM-07)

- **Display Name**: edit it in the User Profile section and tap **Save Changes**. Your email cannot be changed.
- **Appearance**: System, Light or Dark. This applies to this device only.
- **Language**: English, isiZulu or Setswana. It is saved to your account.
- **Task due-date reminders**: this switch is saved, but Nexus does not send reminders yet (AUD-10).
- **Sync account** reloads your profile from the server.

6.2 Export your habit history (UM-08)

1. In Settings, tap **Export habits CSV**, then **Share CSV**.
2. Choose an app (email, Drive, etc.). The file lists habit, frequency and each completed date. Avoid commas in habit names; they break the CSV columns (AUD-11).

6.3 Change password or delete your account (UM-09)

- **Change password**: enter your current password and a new one (6+ characters), then tap Save. You must be online.
- **Delete account and data**: confirm **Delete**. Your account and everything in it are permanently removed from the server and this device. This cannot be undone. You must be online.

7 Working offline

7.1 Understand the sync banner (UM-10)

The banner at the top of every screen tells you where your changes are:

Sync banner messages

Message	Meaning	What to do
Saved on device · waiting to sync (*n* pending changes)	Your change is safe on the phone and not yet on the server.	Nothing. It uploads automatically when you're online, or tap **Sync**.
All changes synced	The server has everything.	Nothing.
Offline · changes saved on device / Offline · showing saved data	The server can't be reached.	Keep working; reconnect later.
Sign in again to sync saved changes	Your session expired.	Tap **Sign in**. Your saved changes are kept.
An item changed on another device · review required	The server rejected one change, for example because you edited an item that was deleted elsewhere.	See UM-11.

Uploads happen while Nexus is open. If Android closes the app, uploading resumes when you open it again. Items you never opened or refreshed while online won't be available offline.

7.2 Resolve a conflict (UM-11)

1. Tap **Review** on the banner.
2. Choose **Discard item edits** to drop your unsent changes to that one item. Your other changes then upload. Or choose **Keep changes** to decide later.
3. Refresh the screen to load the server's current copy.

Until you discard the conflicting item, none of your other pending changes upload (AUD-19). They stay safely on your device.
